Remarkable changes in American healthcare policy have increased the need for excellent administrators. Develop essential leadership and decision-making skills in a Master of Business Administration (MBA) in Health Administration program.

Designed for working professionals, your coursework will present concepts in practical and quantitative terms, so that you can apply them to the workplace immediately. Topics include leadership, financial management, quality improvement, health policy, privacy, and legal and ethical issues. Franklin Pierce offers small classes for in-depth, personalized learning in a program that is accredited by the International Accreditation Council of Business Education (IACBE).

Combine online learning with part or full-time study, and four academic terms, to create a flexible and personalized schedule. You may also be eligible for grants, loans, and scholarships in the form of financial aid.

Graduates of this program are healthcare managers who possess the skills to assume key roles in health administration, public health, and patient-client advocacy.
